DETAILED ACTION

1. The finality of the previous office action is hereby vacated and the rejection below presented.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1, 2, 4 and 16 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 69,80, and 81 of U.S. Patent No. 6,640,900 in view of Kluth et al 6,532,839. Claims 69, 80, and 81 of US 6,640,900 include the elements of claim 1, 2, 4 and 16 of the application except for a sensor comprising an optical fiber and production string. Kluth shows a well construction with a casing (fig. 20) a sensor comprising an optical fiber and production string (col. 18, lines1-8). However, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Claims 69, 80, and 81 of US

Art Unit: 3671

6,640,900, as taught by Kluth, to include a sensor along with a production string to measure parameters of the well important to the well's maintenance and efficiency of production.

Allowable Subject Matter

4. Claims 15, 18-20, 22, 23, and 25-36 are allowed.
5. Claims 5, 7-14 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
